

Tracks 39 & 40 on the CD

Dreaming

Composed by P. Rooke

Practise this scale before you play "Dreaming". It only has 5 different notes and is very easy to play. This melody sounds great with the backing track. You can also make your own tune up using the notes of the scale and try playing that with the backing track. If you like, you can write the notes out for the melody you made up on the following page and that will be your very first composition. You can even write your name in the space provided.

Scale

Melody
